

FMF Cape Breton – Op LASER Update 22 February 2022

Current Posture:
3A(S) “Surge – Shift” → 3A “Surge” 28 Feb 22

Update Message

We have had great performance in our current posture, getting close to our typical weekly output despite some inefficiencies. We have continued our work in HMC Ships *Winnipeg* and *Ottawa*, we are nearly finished the work period in HMCS *Victoria*, and we are continuing our support to HMCS *Corner Brook* as well as remote support to HMC Ships *Vancouver* and *Calgary*, which are on exercise. We have also been instrumental in preparing *Kingston* class ships for deployment and for Force Generation, and have even had a hand in supporting the *Orca* class training vessels.

While provincial and DND tracking of COVID numbers overall has become somewhat less reliable due to the move away from required testing those with symptoms who are not at high risk, we are now seeing the number of people off work with actual or potential COVID cases drop significantly. At the same time, the province has loosened up much of the direction restricting discretionary activities. This is all good news, and has also contributed to the CO’s direction to move to our “3A – Surge” posture on Monday 28 Feb 22. Please remember to continue to follow health measures, which can help to reduce transmission and potentially preclude future imposition of stricter controls.

Work Priorities

- WIN SWP in preparation for RIMPAC and Force Employment summer 2022;
- OTT EWP2 in preparation for TRP and Force Employment summer 2023;
- COR EDWP support and reactivation in preparation for TRP this year; and
- VIC WP202 completion in preparation for docking and 3rd line maintenance period.
